FIGURE 4

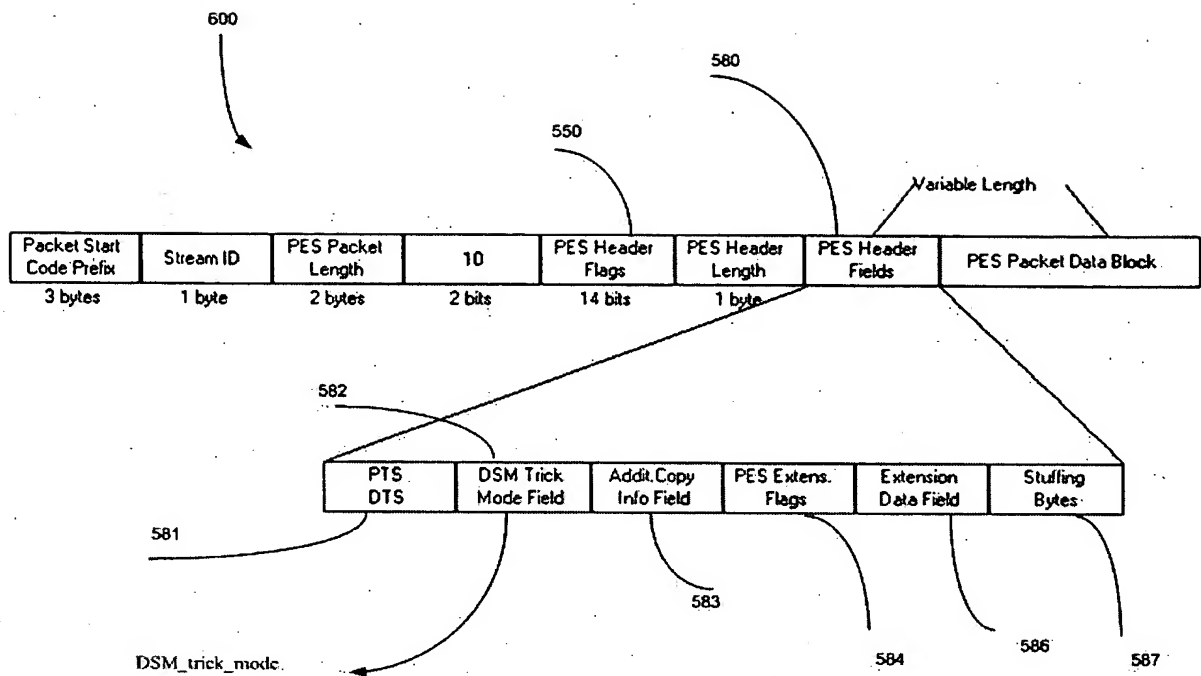

TM (DSM_trick_mode_flag)

Indicates the presence of an 8 bit field describing the DSM (Digital Storage Media) operating mode:

- 1 - Field is present.
- 0 - Field is not present. (For broadcasting purposes, set = 0.)

FIGURE 5

DSM_trick_mode.

An eight bit field indicating the nature of the information encoded. The field is further partitioned as follows:

trick_mode_control (3 bits),
field_id (2 bits),
intra_slice_refresh (1 bit), and
frequency_truncation (2 bits).

trick_mode_control

Indicates the nature of the DSM Mode:

000 - Fast Forward
001 - Slow Motion
010 - Freeze Frame
011 - Fast reverse
1xx - Reserved.
